	The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1)🖂	Responsive to communication(s) filed on 15 Ju	ly 2005.				
2a) <u></u> □	This action is FINAL . 2b)⊠ This action is non-final.					
3)	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is					
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.						
Dispositi	on of Claims					
4)⊠ Claim(s) <u>1-12 and 14-20</u> is/are pending in the application.						
	4a) Of the above claim(s) is/are withdrawn from consideration.					
5) Claim(s) is/are allowed.						
6)⊠	Claim(s) <u>1-12 and 14-20</u> is/are rejected.					
<u> </u>	Claim(s) is/are objected to.					
8) Claim(s) are subject to restriction and/or election requirement.						
Application Papers						
9)□ .	The specification is objected to by the Examine	r.				
10)⊠ The drawing(s) filed on <u>15 July 2005</u> is/are: a) accepted or b)⊠ objected to by the Examiner.						
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).						
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).						
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.						
Priority u	nder 35 U.S.C. § 119

Art Unit: 2851

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1, 10-12, 14, 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Payne (2004/0263930).

Payne (2004/0263930) discloses a projection device comprising:

A coherent light source [0017], which may be a laser source;

An EASLM (1) addressed with CGH images [0009];

Optics (4,5) for directing and magnifying the diffracted images to a screen (9).

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 3-4, 6-9, 16-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Payne in view of Crossland (6,654,156).

Application/Control Number: 10/542,491

Art Unit: 2851

Payne discloses the invention substantially as claimed but does not specify the use of color sequential illumination. Payne further states that monochromatic sources are preferably for addressing EASLM's.

The use of color sequential illumination and multiple imaging panels for each of several colors is well known in the art.

Crossland et al. (6,654,156) teaches the use of color sequential monochromatic illumination for a holographic addressed EASLM.

It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the device of Payne by providing color sequential laser illumination in order to form full color images on the imaging surface. In a sequential system the frame rate of the SLM would be greater than that of the viewable image formed at the screen.

With regard to Claims 7-9, 16-19, it is well known to store images within computer means for delivery to modulation systems. As such it would have been obvious to provide such computer controls means in order to allow for the projection of various images without the necessity of having to create them individually when desired.

5. Claims 2-3, 5, 15 are rejected under 35 U.S.C. 103(a) as being unpatentable Payne in view of Suh (5,805,244).

Payne discloses the invention substantially as claimed but does not specify the use of plural panels or sections for forming different color component images and combining them for full color image formation. Payne further states that monochromatic sources are preferably for addressing EASLM's.

Art Unit: 2851

Suh teaches the illumination of multiple displays with colored lights and the combination and projections of colored modulated lights to form a full color image. It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the device of Payne by providing plural imaging devices to form a combined color image on a projection surface.

Drawings

6. Figure s 1A, and 1B should be designated by a legend such as --Prior Art--because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

7. The disclosure is objected to because of the following informalities: The brief description of the drawing does not individually address Figures 1A and 1B.

Appropriate correction is required.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William C. Dowling whose telephone number is 571-272-2116. The examiner can normally be reached on MON-THURS.

Art Unit: 2851

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Diane Lee can be reached on 571-272-2399. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272/1000.
